

## THE BOSTON CENTER

A decorative illustration of a classical column with a capital, positioned on the left side of the page.

The Boston Center is a facility designed to provide you with the optimum environment to improve your appearance. It is staffed by a group of highly skilled and trained medical professionals.

Each member of our staff—including plastic surgeons, dermatologists, anesthesiologists, nurses, therapists and aestheticians—is highly qualified and certified. The plastic surgeons are faculty members at the Harvard Medical School. Our registered nurses are trained and experienced in the needs of cosmetic surgery patients. Our anesthesiologists are board certified MDs with special expertise in outpatient anesthesia techniques. Our aesthetician has special training and experience in the skin care needs of the cosmetic surgery patient.

The Boston Center is located in the historic landmark building—the Vendome—on 170 Commonwealth in Boston's Back Bay. It is designed to provide elegant, discreet preoperative evaluation, surgery, and postoperative care. A key component of the Boston Center is our attached ambulatory surgical facility, which is the area's only JCAHO accredited ambulatory surgery unit committed solely to cosmetic surgery, in operation since 1981.

It is staffed and equipped to provide you with the safety of a hospital with the privacy and personalized care of a fine hotel. Depending on the type of procedure, patients can return home the same day as their surgery or they may stay overnight.

The Boston Center's combination of plastic surgeons, professional staff, and facilities is designed to provide you with state of the art cosmetic surgery and the highest quality personalized care.
